Magnesium Glycinate

Sleep Benefit

Magnesium glycinate helps improve sleep by calming the nervous system and reducing mental and physical tension, promoting relaxation and reduced anxiety.

Why it Matters for Sleep

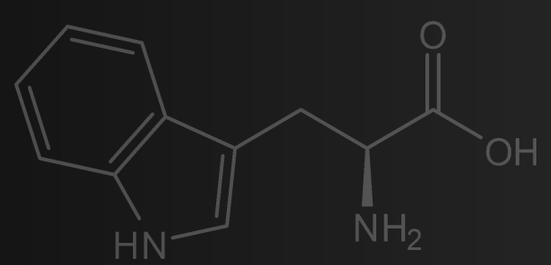

Magnesium glycinate contains glycine, an amino acid that acts as an inhibitory neurotransmitter, helping to calm brain activity. Combined with magnesium's role in regulating GABA (gamma-aminobutyric acid)—a key neurotransmitter involved in sleep initiation—this form is particularly effective at helping the body and mind wind down, making it easier to fall asleep and stay asleep.

Enhanced Benefits with

L-Tryptophan, Vitamin B6, L-Theanine, Lemon Balm, Passion Flower, Apigenin

---

L-Tryptophan

Sleep Benefit

Tryptophan improves sleep by boosting natural melatonin production, which regulates your internal clock and promotes sleep onset.

Why it Matters for Sleep

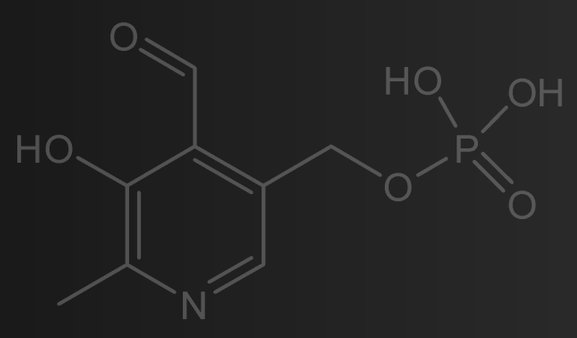

Tryptophan is an essential amino acid that the body converts into serotonin, which is then converted into melatonin in the pineal gland. Supplementation with tryptophan leads to naturally increased melatonin production, which helps you fall asleep faster and maintain a regular circadian rhythm.

Enhanced Benefits with

Vitamin B6, Magnesium, L-Theanine, Passion Flower, Zinc, Apigenin

---

Vitamin B6 (Pyridoxine HCl)

Sleep Benefit

Vitamin B6 enhances sleep by supporting the natural production of melatonin via the serotonin pathway.

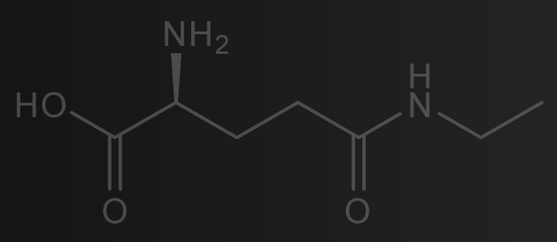

Why it Matters for Sleep

Vitamin B6 (Pyridoxine HCl) is essential for converting tryptophan into serotonin, and serotonin into melatonin. Without adequate vitamin B6, this conversion is inefficient, leading to lower melatonin levels and disrupted sleep. Therefore, vitamin B6 and tryptophan work together synergistically to naturally boost and regulate melatonin production to help you fall asleep faster and improve sleep quality.

Enhanced Benefits with

L-Tryptophan, Magnesium, Glycine, Zinc, L-Theanine

L-Theanine

Sleep Benefit

L-theanine supports sleep by calming the mind and reducing anxiety, without causing drowsiness.

Why it Matters for Sleep

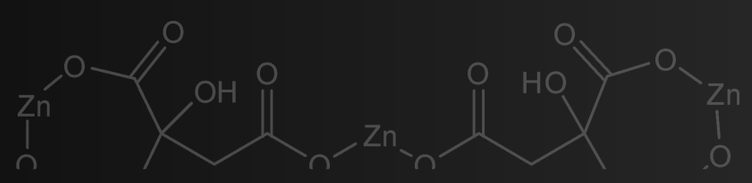

L-theanine increases GABA (gamma-aminobutyric acid), serotonin, and dopamine levels while promoting alpha waves—associated with a calm, focused, and relaxed mental state. This helps reduce anxiety and mental hyperactivity, making it easier to fall asleep naturally and improve sleep quality, especially in those with stress-related sleep issues.

Enhanced Benefits with

Magnesium Glycinate, L-Tryptophan, Vitamin B6, Lemon Balm, Apigenin, Valerian Root, Zinc

---

Zinc Citrate

Sleep Benefit

Zinc citrate supports natural melatonin production and regulation, which helps maintain healthy sleep-wake cycles by promoting more consistent and restful sleep.

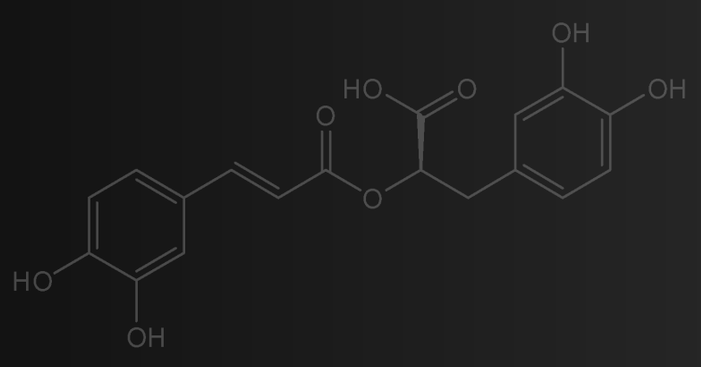

Why it Matters for Sleep

Zinc is a cofactor in the enzymatic processes that convert L-tryptophan to serotonin, and serotonin to melatonin. Adequate zinc levels—especially in bioavailable forms like zinc citrate—help ensure optimal melatonin synthesis, leading to improved sleep onset and quality, particularly in people with zinc deficiency or disrupted circadian rhythms.

Enhanced Benefits with

L-Theanine, Magnesium Glycinate, Vitamin B6

Lemon Balm Extract

Sleep Benefit

Lemon balm extract enhances sleep by reducing anxiety and restlessness through modulating GABA activity in the brain.

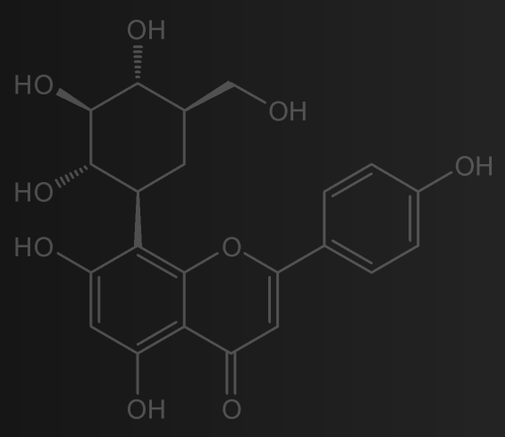

Why it Matters for Sleep

Lemon balm (melissa officinalis) contains compounds like rosmarinic acid that inhibit GABA transaminase, the enzyme that breaks down GABA. This leads to higher GABA levels, promoting a calming effect on the nervous system, which helps ease sleep onset and improves sleep in anxious or stressed individuals.

Enhanced Benefits with

Valerian Root, L-Theanine, Magnesium Glycinate, Passion Flower, L-Tryptophan, Hops, Apigenin

Passion Flower

Sleep Benefit

Passion flower improves sleep by quieting the mind and calming mental overactivity through GABA modulation.

Why it Matters for Sleep

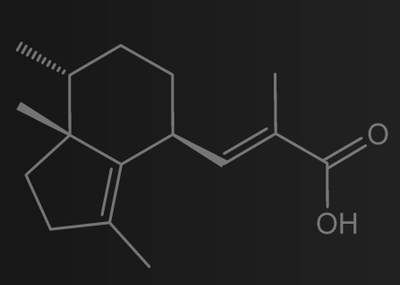

Passion flower (passiflora incarnata) increases GABA levels in the brain, which helps slow neural activity, reduce anxiety, and calm mental chatter—making it especially useful for people who have trouble falling asleep due to racing thoughts or nervous tension

Enhanced Benefits with

Valerian Root, Lemon Balm, Hops, L-Theanine, Magnesium Glycinate, Apigenin, L-Tryptophan

---

Valerian Root

Sleep Benefit

Valerian root extract helps you fall asleep faster by enhancing GABA signaling and calming neural activity in the brain.

Why it Matters for Sleep

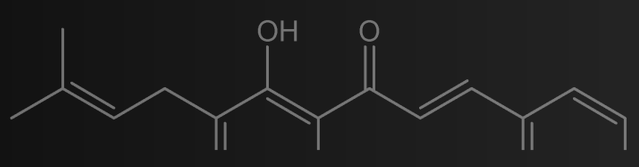

Valerian root contains compounds like valerenic acid, which inhibit the breakdown of GABA (gamma-aminobutyric acid), the brain's primary calming neurotransmitter. This leads to increased GABA availability, helping to induce drowsiness and promote sleep onset—especially in individuals with insomnia or stress-induced sleeplessness.

Enhanced Benefits with

Lemon balm, Passion Flower, Hops, L-Theanine, Magnesium Glycinate, L-Tryptophan, Apigenin

---

Hops Extract

Sleep Benefit

Hops extract promotes faster sleep onset by gently sedating the nervous system through modulation of the GABAergic and adenosine pathways.

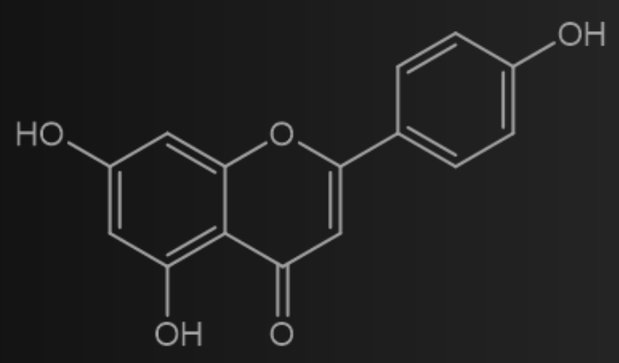

Why it Matters for Sleep

Hops (Humulus lupulus) contains alpha acids and prenylflavonoids (like xanthohumol) that enhance GABA activity and interact with adenosine and melatonin receptors, leading to mild sedative effects. This helps you fall asleep more quickly and may improve overall sleep depth, especially when combined with valerian root.

Enhanced Benefits with

Valerian Root, Passion Flower, Lemon Balm, L-Theanine, Magnesium Glycinate, L-Tryptophan

Apigenin

Sleep Benefit

Apigenin supports sleep by promoting sedation and reducing anxiety through its binding to GABA type A receptors, helping calm the nervous system and ease sleep onset.

Why it Matters for Sleep

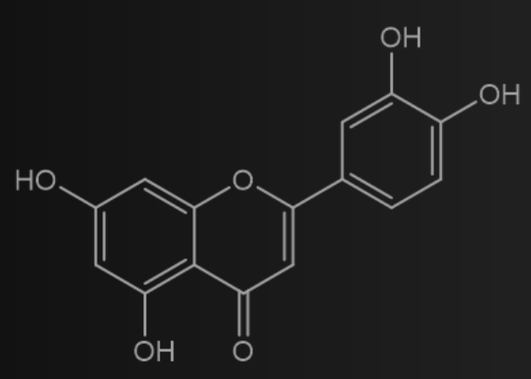

Apigenin, a flavonoid found in chamomile, acts as a natural GABA type A receptor agonist, similar in mechanism to benzodiazepines but much milder and non-habit-forming. This results in a calming, anxiolytic effect, helping the body wind down and fall asleep more easily.

Enhanced Benefits with

L-Theanine, Magnesium Glycinate, Lemon Balm, Passion Flower, L-Tryptophan

---

Luteolin

Sleep Benefit

Luteolin supports better sleep quality by reducing neuroinflammation, which helps restore healthy sleep regulation and circadian rhythm balance.

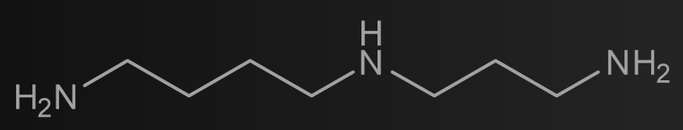

Why it Matters for Sleep

Chronic inflammation—especially in the brain—can impair sleep by disrupting hypothalamic and circadian signaling. Luteolin is a flavonoid with potent anti-inflammatory and antioxidant properties that can cross the blood-brain barrier. By reducing neuroinflammation, luteolin may support more restorative, deeper sleep, especially in individuals with sleep disruption linked to stress, aging, or neurodegeneration

Enhanced Benefits with

Apigenin, Magnesium Glycinate, L-Theanine, Lemon Balm

Spermidine

Sleep Benefit

Spermidine promotes restorative sleep quality by enhancing cellular autophagy, which supports brain health and circadian rhythm regulation over time.

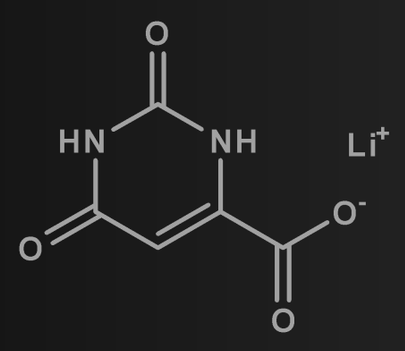

Why it Matters for Sleep

Spermidine activates autophagy—a cellular "clean-up" process critical for removing damaged proteins and organelles, especially in the brain. Healthy autophagic function in neurons is linked to better sleep architecture, reduced neuroinflammation, and stabilization of circadian rhythms, which collectively contribute to deeper, more restorative sleep over time

Enhanced Benefits with

Magnesium Glycinate, Apigenin, L-Theanine, Luteolin

Lithium Orotate

Sleep Benefit

Lithium orotate is a compound that combines lithium—a naturally occurring trace mineral—with orotic acid to enhance its bioavailability. This form of lithium is known for its calming and mood-stabilizing properties, which may help reduce stress and support deeper, more restorative sleep. Emerging research also indicates that lithium orotate could exert neuroprotective effects, contributing to overall brain health and possibly enhancing cognitive performance.

Why it Matters for Sleep

Lithium orotate targets a several **core biological systems that help regulate circadian rhythm, mood stability, and neural excitability**—all of which directly influence how well you fall asleep and stay asleep.

Enhanced Benefits with

L-Theanine, Magnesium Glycinate, Lemon Balm, Passion Flower, L-Tryptophan
